ID	Initiated By	Description
		No infrastructure or environment changes associated with this release

Bug Fixes

ID	Reported By	Description
1	Product Team	Enhance advICE to present Green tick icon
2	Product Team	Enhanced error message when attempt is made to Delete an HR
3	Product Team	Enhanced error message when attempt is made to Delete a Project
4	Product Team	Move Task functionality enhanced to prohibit moving of Closed tasks to a different Stage. Filter candidate tasks for Move function to exclude Closed or Active tasks.
5	Customer	Resolved Add Task duplication arising from double-click of Apply button
6	Customer	Schedule SoE screen - extend Programme Name field to avoid truncation/wrapping
7	Customer	Breadcrumb navigation - all active links not present "Hand" icon when hovering above
8	Product Team	Filter out Implementation Managers when building the Stakeholder list for Communications
9	Customer	Maintain SoE screen 114 - increase display field length to accommodate longer URLs for SLA and Service Diagrams
10	Product Team	Clone SoE functionality modified to enable changes in Service, Programme and Project to be made correctly at the initial cloning stage
11	Customer	Amend business rules to allow for the deletion of an abandoned SoE.
12	Customer	Resolve issue with Menu options presented during SoE Construction
13	Customer	Resolved Edit Task duplication arising from double-click of Apply button

Features

The following table defines the features that have been added or enhanced as part of this release.

ID	Initiated By	Description
1	Product Team	Log RAG status changes into SoE History
2	Product Team	Maintain SoE screen 114 - presentation changes to align related times on a horizontal layout
3	Product Team	Gauge screen 120 - add the RTUP panel
4	Customer Request	On Home Page, display elapsed time in My Tasks panel for active tasks
5	Customer Request	Schedule SoE screen - present Implementation and Backout plan duration
6	Customer Request	Edit Task icon removed from all screens, replaced by active link from Task Title
7	Customer Request	Menu name change - replace OBS with Organisation
8	Customer Request	Consolidate Edit & View screens into a single screen
9	Customer Request	RTUP - present a "variance" value to indicate whether SoE is running ahead or behind schedule, and if so by how much
10	Customer Request	Provide an SoE Description which allows a more detailed definition of the SoE to be provided (in addition to the short SoE Title)
11	Product Team	Service Catalogue - amend "Notes" label to read "Description" (for consistency across all similar screens)
12	Customer Request	Present full SoE Description when hovering over the SoE Title at any point in the ICEflo solution. This is a multi-screen modification.
13	Customer Request	Display dependencies for a task by enabling Hover functionality
14	Product Team	Update the Help text for the SoE Implementation and backout
15	Product Team	Add new images for login and trial registration pages
16	Customer Request	Add the Create SoE button to the SoE Calendar View screen
17	Product Team	Display the RAG status panel on the Schedule SoE screen to enable the user to immediately assess the effects of any schedule parameter change
18	Customer Request	Add document repository to enable customers to upload documents. Document upload facilities are now available at both the SoE and task level.
