

<b>Release Version</b>	<b>ICEFLO 5.3</b>
Release Date:	16/07/19
Date Approved:	09/07/19
Approved By:	Jackie Smith

## Release Note

The content of this release note relates to new features, enhancements and bug fixes in ICEFLO for Mobile (M) and Enterprise (E) editions. These are defined in the tables below:

## New Features

The following table defines the features which have been introduced as part of this release. More information on some of these features can be found in the What's New video or articles available from our Training Centre: <https://training.iceflo.com/m/73525>

ID	Title	Description	M	E
1.	List all Event Users	From the 'More Options' menu there is now a 'Teams' link which lists all users across the Runbooks included in the Event.		✓
2.	Issue User Defined Fields	Dictionary Enabled User Defined Fields have been added for Issues.		✓
3.	Sample Data in New Client	To assist new ICEFLO customers we can now populate an active runbook into a newly created client.		✓
4.	Help Tour	A simple help tour has been added to newly created clients to compliment the pre-populated runbook.		✓

## Enhancements

The following table defines the features which have been enhanced as part of this release:

ID	Title	Description	M	E
1.	Performance	A range of enhancements have been made to reduce the load time of various screens within ICEFLO. These are – Issues 620 & 720, Event Activity 716, List Runbooks 110 and Runbook Tasks.		✓
2.	Clarification when Adding Document Links	The error messages when adding an incorrect URL on uploading document links were unhelpful. These have been enhanced to give more information.		✓

3.	Event ID	The Event ID column for predecessor and successor Tasks was missing from the Dependency modal screen (444). This has now been added.		✓
4.	Download Tasks	The Download Tasks report on screen 400, Runbook Tasks, now shows 'Notify Owner', 'Trigger Comms', 'Milestone Level' and 'Activated & Completed By' columns.		✓
5.	Hover Over Help on Raise Issue	The formatting for the hover over help tip on Raise Issue was inconsistent. This has been amended.		✓

## Bug Fixes

The following table defines the bugs which have been fixed as part of this release:

ID	Title	Description	M	E
1.	Runbook Tasks (Edit Mode)	Runbook Tasks - Edit Mode, 404, was not displaying Phase, Stage No, ID on Stage Headers. These have now been added.		✓
2.	Event ID on Stage Header in Task Cards	The Event ID on the Stage Header in Task Cards was not displaying. This has now been added in.		✓
3.	Activate a Task in iOS Mobile Application	In the iOS mobile app you were unable to activate a task. This has been addressed.	✓	✓
4.	My Teams Tasks not populating in Mobile	My Teams Tasks were not populating in mobile in certain scenarios. This has been resolved.	✓	✓
5.	My Runbooks - Schedule	On My Runbooks (screen 111) you could remove the schedule of a Runbook, or partly add one. This has been resolved and validation is now present on My Runbooks.		✓
6.	My Runbooks - Updating an Active Runbook Title	From My Runbooks (screen 111) when updating the title of an Active Runbook an error was being received. This has been fixed and no error will now show.		✓
7.	Estimated Resolution Time on Closed	The Estimated Resolution Time was disappearing on Close Issue. You can now view this as a read only field.		✓
8.	Time Fields on a closed issue are not read only	The Duration fields on a Closed Issue were not read only. This has been addressed.		✓
9.	Task Late Threshold in Configuration	The Task Late Threshold on the Configuration screen (910) was showing in seconds. It has now been changed to minutes.		✓
10.	Data Dictionary on Communications	Fields which have been substituted via the Data Dictionary, but have enabled = No, were still being pulled through on SMS & Email Communications. This has been resolved.		✓

## Merge Fixes

The following table defines the features which have been merged into this release:

ID	Title	Description	M	E
1.	Document URL Character Limit	The Document URL limit has been increased to 100 characters on Add Document at Task & Runbook level.		✓
2.	Event Dependency View	The Event Dependency View (screen 786) has been enhanced to improve load time for the end user.		✓
3.	Copy Stages	Copy stages was occasionally giving an error due to duplicate IDs. This has been fixed.		✓
